

General Terms and Conditions for the Supply of Machinery and Spare Parts

1. Scope of Application

These General Terms and Conditions (hereinafter "T&C") apply to the supply of machinery, spare parts and other products (hereinafter the "Supply") by AARTECH GmbH (hereinafter "AARTECH").

2. Offer and conclusion of contract

2.1 If AARTECH, upon receipt of an inquiry by the customer, submits to the customer an offer, this offer is based on these T&C; the offer is only valid in connection with these T&C (hereinafter the "Offer"). By accepting the Offer, the customer acknowledges that it has received these T&C and that they shall form part of the contract.

2.2 The contract between AARTECH and the customer shall only come into effect, if the customer accepts the Offer of AARTECH without changes and deviations in writing. The contract is further subject to the obtaining of the necessary permits from the authorities and the agreed payment security from the customer. Offers of AARTECH that do not contain a set period for acceptance are binding for a period of 30 days after dispatch by AARTECH.

2.3 The terms and conditions for the Supply are expressly and exhaustively regulated by AARTECH's Offer and its acceptance by the customer as well as by these T&C. Any general conditions of the customer will not become part of the contract. All other agreements and legally relevant declarations must be in writing.

3. Scope of Supply

The scope of the Supply by AARTECH is exhaustively set out in the Offer and any appendices thereto.

4. Designs, Technical Documents and Software

4.1 Unless otherwise agreed, brochures and catalogues are not binding. Designs, drawings and technical documents and data contained in software are only binding insofar as they are declared to form an integral part of this contract by the Offer or the T&C.

4.2 AARTECH retains all rights to designs, drawings, technical documents and software. The customer acknowledges these rights and shall not make such designs, drawings, documents and software available to any third party, either in whole or in part, nor use them for any purposes other than the agreed purposes without prior written authorization by AARTECH.

4.3 If the Supply includes software, the customer is hereby granted the non-exclusive and non-transferable right to use the software for the agreed purpose. The customer is not entitled to make copies (except for the purposes of archiving, error searches or for the replacement of defective data carriers) or to update, upgrade or make any other extensions to the software. The customer may not disassemble, decompile, decipher or reverse engineer the

software without the prior written consent of AARTECH. If the customer breaches one of these conditions, AARTECH is entitled to immediately revoke the right to use the software.

5. Regulations and Standards

5.1 The customer shall, at the latest when placing its inquiry, based on which AARTECH will submit its Offer, refer AARTECH in writing to the standards and regulations applicable to the provision of the Supply, the mode of the Supply and to health and safety.

5.2 Unless otherwise agreed in AARTECH's Offer or the T&C, the Supply shall comply with those standards and regulations at the place of destination of the Supply which AARTECH has been informed of by the customer according to Clause 5.1 above.

6. Warning letters

6.1 Express reservations by AARTECH personnel regarding instructions, directives or measures by the customer or regarding actual circumstances may be made in writing or orally and are deemed to be warning letters by AARTECH relieving AARTECH of any liability.

7. Prices

7.1 All prices are net, ex works, excluding packing, in freely available Swiss francs without any deduction whatsoever.

7.2 Any and all additional costs, such as freight, insurance, fees/ customs duties for export, transit, import and other permits, and for certifications, shall be borne by the customer.

7.3 If taxes, including (without limitation) value added taxes (VAT), levies, fees, social insurance contributions, or the like are levied against AARTECH or its personnel in connection with this contract or its Fulfillment, in particular for Supplies or Services outside of Switzerland, as well as administrative costs connected therewith, these shall be borne by the customer. If taxes, including (without limitation), levies, fees, social insurance contributions, or the like are levied against AARTECH or administrative costs are incurred, these have to be reimbursed by the customer within 30 days of receipt of a copy of the respective documents.

7.4 AARTECH is entitled to adjust the prices in the event that

- the delivery period is extended for any of the reasons set out in Clause 10.4; or
- the nature or the scope of the Supply is changed; or
- the documents provided by the customer do not correspond with the actual circumstances or are incomplete; or
- the price was agreed upon in a currency other than Swiss francs (CHF) and the exchange rate CHF/foreign currency at the time of placing the order deviates by more than +/- 1% from the exchange rate that was published at 12 noon Swiss time by Reuters on the day the Offer has been submitted; or
- laws, regulations or generally accepted rules of interpretation are changed after the submittal of the Offer.

8. Terms of Payment

8.1 Payments shall be made by the customer at AARTECH's domicile, net with no deduction for cash discount, expenses, taxes, levies, fees, duties, and the like. Unless otherwise agreed, the price shall be paid in the following installments:

- 100% within 10 days of notice of readiness of the Supply for dispatch by AARTECH.

Payment shall be deemed made when Swiss francs or the agreed foreign currency have been made freely available and in the full price amount to AARTECH at AARTECH's domicile. In the event that payment by letter of credit is agreed upon, the customer shall bear the costs of opening, notifying and confirming such letter.

8.2 The customer may neither withhold, reduce nor set off payments against own claims. The only exception is the offsetting of counterclaims by the customer, provided that AARTECH has expressly acknowledged these counterclaims in writing.

8.3 The dates for payment shall be complied with even if dispatch, transportation, any installation or acceptance of the Supply is delayed or made impossible due to reasons for which AARTECH is not responsible, or if immaterial parts of the Supply are missing or if post-delivery work, that does not make the use of the Supply impossible, is to be carried out.

8.4 If an agreed payment, advance payment or payment security is not made in accordance with the contractual terms and conditions, the customers shall be in default without a reminder. In this case, AARTECH shall be entitled to adhere to the contract and demand interest for late payment in addition to the payment owed, or to withdraw from the contract. In both cases, AARTECH shall be entitled to claim damages, including compensation for lost profits. The default interest rate shall be 5% per year.

8.5 If the customer, for any reason, is in delay with any payment for another delivery, or if AARTECH has reasonable concerns that it will not receive payments in full or in due time because of circumstances having taken place after the conclusion of the contract, then AARTECH, without prejudice to any other claims, may suspend the further performance of the contract and retain any of the Supply ready for dispatch until AARTECH has received the payments or until new terms of payment and delivery have been agreed and until AARTECH has received sufficient security. If such agreement cannot be reached within a reasonable time, or if AARTECH does not receive sufficient security, AARTECH may proceed in accordance with the provisions of clause 8.4.

8.6 AARTECH is entitled to sell its payment claims and other claims against the customer to third parties.

9. Reservation of Title

AARTECH shall retain ownership of the Supply until receipt of full payment in accordance with the contract. The customer shall take all measures necessary for the protection of AARTECH property and ensure that the title of AARTECH is not prejudiced. In particular, the customer shall arrange for any entry in the public registers in the country of its domicile necessary for a valid reservation of AARTECH's title. The customer shall bear the costs of such entry. If the customer fails to arrange for such entry, it shall be fully liable to AARTECH.

10. Delivery Period

10.1 The delivery period shall commence as soon as the contract has entered into effect and once the advance payments due upon the contract conclusion have been made.

10.2 The delivery period shall be deemed to have been complied with if, before its expiry, the notice of readiness of the Supply for dispatch has been sent.

10.3 Compliance with the delivery period is conditional upon the customer fulfilling all its contractual and non-contractual obligations to AARTECH.

10.4 The delivery period shall be extended for a reasonable term if:

- a) the information required for performance of the contract is not made available to AARTECH in time or is incomplete, or if the customer subsequently changes such information; or
- b) the customer or a third party is in delay with work it has to execute, or the customer is in delay with the performance of its contractual obligations (with respect to the delivery in question or with respect to any other delivery); or
- c) impediments exist which AARTECH, despite the use of the required level of care cannot prevent, regardless of whether such impediments arise at AARTECH's, the customer's or a third party's premises. Such impediments include, in particular, significant factory break-downs, accidents, labor conflicts, late or deficient delivery of raw materials, semi-finished or finished products, important work parts being rejected, measures taken or omissions by any state authorities; or
- d) any other circumstances arise for which AARTECH is not responsible.

10.5 If a specific date is agreed instead of a delivery period, such date shall correspond to the last day of a delivery period. Clauses 10.1 to 10.4 shall apply thereto.

10.6 All claims of the customer arising from or in connection with delays in the performance of the contract are regulated expressly and exhaustively by this Clause. Additional and broader claims, in particular claims for damages, are excluded. This limitation of liability does not apply in the event of gross negligence or willful misconduct by AARTECH, insofar as the delay in delivery is predominantly caused by this.

11. Packing

Packing shall be invoiced separately by AARTECH and may not be returned. However, if the packing is expressly designated as AARTECH's property, it shall be returned by the customer, carriage paid, to the place of dispatch.

12. Transfer of Risk

12.1 Unless otherwise agreed, risk shall transfer to the customer upon delivery ex works (EXW in INCOTERMS 2020).

12.2 If dispatch of the Supply is delayed at the request of the customer or due to reasons for which AARTECH is not responsible, the risk shall transfer to the customer at the time originally foreseen for the Supply to be dispatched from AARTECH's premises. From this time on, the Supply shall be stored and insured at the customer's expense and risk.

13. Inspection and Acceptance of the Supply

13.1 Insofar as it is normal practice, AARTECH shall inspect the Supply before dispatch. If the customer requests further testing, such as an acceptance test, this shall be agreed in writing and paid for by the customer.

13.2 The customer shall inspect the Supply within 30 days after receipt and shall immediately notify AARTECH in writing of any defects. Such notice of defect shall be formulated precisely so that AARTECH can remedy the defect. If the customer fails to do so, the Supply shall be deemed to be accepted.

13.3 To the extent that AARTECH is responsible for the notified defects, AARTECH shall remedy such defects as soon as possible, and the customer shall give AARTECH sufficient opportunity to do so. After remedy of such defects, an acceptance test shall be carried out at the request of the customer or of AARTECH, provided that such acceptance test has been agreed upon in accordance with Clause 13.1.

13.4 Any agreed acceptance test shall also be deemed to have been successfully passed:

- if the customer or its representative does not participate in the acceptance test;
- if the acceptance test cannot be carried out on the date arranged for reasons for which AARTECH is not responsible;
- if the customer refuses to sign the acceptance report;
- as soon as the customer puts the Supply to use, places it in its warehouse or impliedly accepts the Supply in any other way;
- if the customer refuses acceptance without being entitled to do so.

13.5 All claims of the customer arising from or in connection with defects in the Supply are governed expressly and exhaustively by Clause 13 and 14. Other and further claims are excluded. This limitation of liability does not apply in the event of gross negligence or willful misconduct by AARTECH, insofar as the defect in question is predominantly caused by this, or in the event of death or injury to a person of the customer as a result of the delivery by AARTECH.

14. Warranty

14.1 Warranty Period

The warranty period is 24 months. The warranty period begins when the delivery leaves the factory or, if an acceptance test is agreed, upon acceptance of the delivery or, if AARTECH also takes over the installation of the delivery, upon completion thereof. If dispatch, transportation, any possible installation, commissioning or acceptance is delayed due to reasons for which AARTECH is not responsible, the warranty period shall end not later than 18 months after AARTECH's notification that the Supply is ready for dispatch.

The warranty period for repaired parts of the Supply shall recommence and last for 6 months after remedy of the defect or acceptance but shall end not later than the expiry of a period which is double the warranty period stipulated in the preceding paragraph of this Clause.

The warranty period shall expire prematurely if the customer or a third party undertakes inappropriate modifications or repairs to the Supply or if the customer, in the event of a defect, does not immediately take all appropriate steps to mitigate the damage and give AARTECH the opportunity to remedy such defect.

14.2 Liability for Defects in Material, Design and Workmanship

Upon written request by the customer, AARTECH shall remedy within a reasonable period any parts of the Supply which, before the expiry of the warranty period, are proved to be defective or unusable due to defective material, faulty design or poor workmanship, provided that the customer has notified AARTECH in writing of the defects during the warranty period and immediately after discovery. The customer shall give AARTECH sufficient opportunity to carry out such remedial works. Replaced parts shall become AARTECH's property. AARTECH shall bear the costs of remedying the defective parts at its factory sites. If, at the customer's request, the repairs are carried out outside AARTECH's factory sites, the customer shall bear all related costs such as transportation, travel and accommodation costs as well as taxes, levies and fees incurred outside of Switzerland.

14.3 Liability for Warranted Qualities

Warranty liability shall only cover those characteristics that have been expressly guaranteed by AARTECH in the offer for the delivery in question. Such warranties are valid until the expiry of the warranty period. Evidence of the warranted qualities shall be provided by any possible acceptance test. If the warranted qualities are not achieved or only partially achieved, the customer may initially only require AARTECH to carry out the necessary remedial works. The customer shall give AARTECH the necessary time and opportunity to do so. If such remedial works fail completely or in part, the customer may claim such compensation as was agreed upon for such event, or, if such an agreement was not made, a reasonable reduction in price. If, however, the defects are so major that they cannot be remedied within a reasonable time and provided the Supply cannot be used for its specified purpose, or if such use is considerably impaired, the customer may refuse acceptance of the defective part of the Supply or, if partial acceptance is economically not justifiable, withdraw the contract. In such event, AARTECH is only liable for reimbursement of the sums paid to it for the parts of the Supply affected by the withdrawal from the contract.

14.4 Warranty claims

AARTECH is not liable if the Supply does not comply with the provisions of the contract and that non-compliance is caused by the customer itself. If the Supply does not comply with the contract, that non-compliance is deemed to be caused by the customer itself, in particular if it was the result of defective maintenance, failure to observe the operating instructions, excessive use, use of any unsuitable operating means, chemical or electrolytic influence or work not undertaken by AARTECH.

AARTECH is furthermore not liable if the Supply does not conform with the provisions of the contract as a result of normal wear and tear, improper use by third parties, use of spare parts or material belonging to the customer or third parties, maintenance by third parties, natural disasters or accidents.

14.5 Subcontractors

AARTECH's liability for defects in respect of supplies and services provided by subcontractors nominated by the customer shall be no greater than such subcontractors' liability for defects towards AARTECH. AARTECH may satisfy any liability claims of the customer by assigning its own liability claims against the subcontractor concerned to the customer.

14.6 Exclusivity of Warranty Claims

Any warranty claims of the customer are expressly and exhaustively regulated by this Clause 14. Additional claims and broader claims are excluded. This limitation of liability does not apply in the event of gross negligence or willful misconduct by AARTECH, insofar as the defect or damage in question is predominantly caused by this.

14.7 Liability for Additional Obligations

AARTECH shall only be liable to the customer for incorrect advice and the like or for the breach of any additional obligations in the event of gross negligence or willful misconduct, insofar as the damage in question is predominantly caused by such breach of obligations.

15. Contract Performance

15.1 In all cases where the contractual obligation is not performed properly and where this is not expressly governed by the T&C or the Offer, the customer shall grant AARTECH a reasonable grace period to remedy its performance. If such additional period lapses and is unused due to fault on the part of AARTECH, the customer may withdraw from the contract with respect to the part of the Supply not in conformity with the contract or which is anticipated not to be in conformity with the contract. In such an event, AARTECH shall be only liable for reimbursement of sums paid to it for the parts of the Supply affected by the termination.

15.2 In the event of a contract termination by the customer in accordance with Clause 15.1 above, the provisions of Clause 19 shall apply with regard to any liability of AARTECH.

16. Contract withdrawal by AARTECH

The contract shall be adjusted accordingly if unforeseen events substantially change the economic impact or the content of the Supply or substantially impair the performance of the contract by AARTECH, or if provision of the Supply becomes entirely or partially impossible. Insofar as such amendment is not economically justifiable, AARTECH may withdraw from the contract or the individual provisions affected.

If AARTECH wishes to withdraw from the contract, it shall, immediately inform the customer of the consequences thereof even if an extension of the delivery time has previously been agreed. In the event of withdrawal from the contract, AARTECH shall be entitled to payment for those parts of the Supply which have already been completed. Claims for damages by the customer are excluded.

17. Export Control

The customer acknowledges that the Supply may be subject to Swiss and/or foreign statutory provisions and regulations regarding export control and, without export or re-export permits from the competent authorities, may not be sold, leased or otherwise transferred or used for a purpose other than that agreed upon. The customer agrees to comply with such provisions and regulations. The customer acknowledges that such provisions and regulations may change and are applicable to the contract according to the wording valid at the time.

Furthermore, the customer acknowledges that these provisions and regulations may be subject to change and are applicable in their current valid form at the time of signing the contract. The Supply may neither directly nor indirectly be used in any way in connection with the design, production, use or storage of chemical, biological or nuclear weapons or carrier systems.

18. Data Protection

The privacy policy on the AARTECH website applies.

19. Limitation of Liability

19.1 Any claims and remedies of the customer arising out of or in connection with the contract or the improper performance of the contract are expressly and exclusively governed by these T&C. Any other or additional claims in connection with the performance or non-performance of this contract, including claims and remedies originating from tort and positive breach of contract, are, to the extent legally permissible, excluded.

19.2 In the event of a breach of contract AARTECH shall only be liable, if the damage was caused by gross negligence or willful misconduct. In no event shall AARTECH be liable for any damage caused by minor or moderate negligence; liability is in particular excluded for any damage resulting from or in connection with lost profits, lost sales or orders and other business opportunities, production interruptions, data loss and capital costs.

AARTECH's maximum liability is limited to three times the applicable order volume in CHF.

20. Right of Recourse by AARTECH

In the event of damage to third parties as a result of acts or omissions of the customer or its personnel for which AARTECH is held liable, AARTECH shall have a right of recourse against the customer.

21. Installation of Plant and Machinery

If AARTECH carries out the installation or the supervision of the installation of the Supply, the General Conditions of Installation of Plant and Machinery of AARTECH, which are enclosed to the Offer, are applicable to such installation.

22. Miscellaneous Provisions

22.1 Amendments to the contract must be in writing to become effective. This does also apply to any change or deletion of this provision.

22.2 If a provision of these General Conditions should prove to be wholly or partially ineffective, the parties shall replace such provision with a new provision that comes as close as possible to the legal and economic effect of the original provision.

22.3 These T&Cs are available in German and English, with the German version taking prevalence.

23. Jurisdiction and Applicable Law

23.1 Exclusively place of jurisdiction for any dispute arising from or in connection with the contract between AARTECH and the customer shall be Zürich/Switzerland. AARTECH may, however, also bring an action before the courts at the customer's domicile.

23.2 This contract shall be governed by Swiss substantive law. The "United Nations Convention on the International Sale of Goods" of April 11, 1980, shall not apply.
